

MEETING CALENDAR

For information about these and other professional conferences see
www.docguide.com

4th World Congress of Neurorehabilitation

February 12th-16th, 2006
Hong Kong, China

For information: info@wcnr2006.com

Joint Meeting of MSIF, European MS Platform and the UK MS Society

April 20th- 23rd, 2006
Manchester, England, UK

For information: info@mssociety.org.uk

20th Annual Conference of the Consortium of Multiple Sclerosis Centres (CMSC)

May 31st-June 4th 2006
Phoenix, Arizona, USA

For information: www.ms-care.org

11TH ANNUAL CONFERENCE OF RIMS BARCELONA 2006

The next annual meeting of RIMS will be held in collaboration with the world renowned Guttmann Centre in Barcelona, Spain from May 10th - 12th 2006. The executive board invites all members to participate and welcomes all contributions. The deadline for the submission of abstracts is March 21st 2006.

For more details see www.rims.be.

RIMS Annual Membership Fees

Centre:	400 Euro
Individual:	130 Euro
Student:	25 Euro
Company:	750 Euro

Current members who have not yet paid their annual membership fee are kindly asked to do so:
International Bank Account Number:
(IBAN) DE98 7002 0270 0665 8212 18
SWIFT (BIC).HYVEDEMMXXX to:
RIMS - Rehabilitation in Multiple Sclerosis.
Bank: HypoVereinsbank AG Munchen

Join RIMS as a member

RIMS is a fruitful network for all professionals working in the field of MS. Therefore we encourage all MS Centres, MS Societies and individual professionals to join the network. If you want more information about RIMS or how to become a member you are welcome to contact Brita Loevendahl who is the "New Members Coordinator" for the RIMS Executive Board. She can be reached at 0045 27 11 78 81 or mail: brita.loevendahl@mail.dk. She will endeavour to get back to you as quickly as possible.

SIG Funding Opportunity

RIMS Special Interest Groups (SIG) may apply to the Executive Board for a maximum of 2,500 Euro for the purpose of organising interim meetings. 1,000 Euro will be paid to the organisers before the meeting as soon as an official programme with the preliminary budget has been sent to the president. 1,500 Euro will be paid out after the meeting as soon as a short report of the meeting has been delivered for placing on the website and for publication in Network

The amount is not cumulative and expires if not utilised within the RIMS financial year.

For more information please contact: eija.luoto@ms-liitto.fi

NETWORK is published for RIMS at the Swiss Multiple Sclerosis Society, Zurich, Switzerland
September 2005

NEW OFFICIALS ON BOARD – THE CHALLENGES ARE ONGOING

The 10th Annual Conference was held in May 2005 in Tallinn, Estonia. I strongly feel it was a very successful meeting attended by 300 professionals with diverse experience in MS. This conference again underlined the fact that RIMS has a broad remit, which incorporates all aspects of MS and its management from the very beginning of the disease. The "will-be-remembered" moments were dinner at a medieval Tallinn stone house and the real life feeling of the nearby museum village, where we could enjoy the folk dancing of young Estonian girls and boys.

Five new Executive Board members were elected. In this context I would especially like to express my gratitude to Dr. Claude Vaney, who preceded me as President, for his energy in developing new strategies for the future of our organisation. I will be only too glad to listen to his further advice in guiding our organisation forwards. It is my great pleasure to invite him to become a member of the RIMS Advisory Board.

I feel very happy that three members of the previous board continue to offer their services; Holger Albrecht as treasurer, Paul van Asch as secretary and Katrin Gross-Paju as an experienced board member. I am very happy to note that all new members have taken on responsibilities which will help develop RIMS. Our focus is on recruiting new members as well as keeping all members well informed about our activities. Judith Lutz has undertaken the editorial task of producing the RIMS newsletter, Network, twice a year. She will also act as a link between the Special Interest Group (SIG) chairpersons and the Executive Board. Brita Lövendahl will be responsible for membership issues and will be developing strategies for maintaining good and regular relations with the members. In order to help her with this Claudio Solaro will put together information describing the benefits of being a RIMS member. Ingrid Galan is very active in planning the next RIMS meeting in May 2006 in Barcelona.

I am hopeful that the next three years will show a growth in members, as well as increasing activities in the SIGs of a vivid multiprofessional nature, this latter being crucial for their success. In my mind, the rehabilitation of PwMS with high quality rehabilitation nursing should be regarded as at least as worthwhile as the current drug treatments.

The 11th RIMS Annual Conference in Barcelona 2006 will be the next time I hope to see you all. We have a great opportunity to organise the conference with a very experienced local partner, the Institute Guttmann, their enormous range of activities. I am sure that the programme will be most interesting and challenging for us all.

Eija Luoto, RIMS President

Network is the official newsletter of RIMS, a non-profit organisation of multiple sclerosis centres in Europe, bringing together all health care professionals involved in the care of persons with MS.

EXECUTIVE BOARD (2005-2008)

Eija Luoto,
Administrative
director (FI):
President

Paul van Asch, PT
(B):
Secretary

Holger Albrecht, MD
(D):
Treasurer

Katrin Gross-Paju,
MD (EE)

Ingrid Galan, MD
(SP)

Claudio Solaro, MD
(I)

Judith Lutz, MD
(CH)

Brita Loevendahl,
Director (DK)

SPECIAL INTEREST GROUPS

Mobility

Dr. C. Vaney (CH), Chairman
Dr. H. Albrecht (D), Co-chairman

Next meeting: 9th - 11th March 2006 in Masku,
Finland

Bladder, Bowel and Sexual Disorders

Prof. D. De Ridder (B), Chairman

Psychology and Neuropsychology

Dr. P. Hämmäläinen (FL), Chairman
Dr. A. Jonsson (DK), Co. chairman

Next meeting: 28th - 29th October 2005 in Genua,
Italy

Communication and Swallowing

Dr. G. Ganty (B), Chairman

SIG Participation and Integration

R. Verdoodt (B), Chairman
An van Nunen (B), Co-chairman

Next meeting: 21st-22nd October 2005 in Brussels,
Belgium

Occupation

M. Duportail (B), Chairman
D.Kos (B), Co-chairman

Next meeting in Spring 2006 in Brussels, Belgium
For more information please contact the SIG group
coordinator: jlutzmultiplesklerose.ch

RIMS MEMBERS WIN IN TALLINN

During the 10th RIMS Conference in Tallinn, Estonia
in May 2005 prizes were awarded by the Scientific
Awards Committee for outstanding contributions.

A summary of the best abstracts is provided here.

Does peripheral cooling influence MS intention tremor?

P Feys, W Helsen, X Liu, H Albrecht, B Nuttin, P Van
Asch, S Ilsbrouckx, M Duportail, P Ketelaer

Intention tremor in the upper limb obviously inter-
feres with the execution of many daily life activities
and is very difficult to treat. The aim of this study was
to investigate the effect of sustained arm cooling on
intention tremor in MS patients.

A cooling intervention was applied to the forearm at
two different intensities.

Both cooling interventions reduced the overall tremor
amplitude and frequency proportional to the cooling
intensity. The tremor reduction persisted during the
post-cooling evaluation period of 30 minutes.

These findings are clinically important because app-
lying peripheral cooling might enable patients to per-
form functional activities more efficiently.

The committee comment: This very important work
received the prize for the best platform presentation.
This is an interesting study showing one possible way
to manage a very difficult symptom of MS - intention
tremor. It is notable that the study was conducted by
multidisciplinary teams from different centres and
they concentrated on one method in physiotherapy.
The study adds valuable scientific information about
evidence based methods in physiotherapy.

Executive functions and their relations to depression in patients with multiple sclerosis: preliminary results.

K Kompus, L Sema, A Toomela, M Kreegipuu,
K Gross-Paju

Patients with multiple sclerosis (MS) often suffer from
reduced performance in several cognitive domains,
most prominent and perhaps also most widely stu-
died of which are difficulties in memory. Depression,
which often occurs in patients with MS, may further
contribute to reduced cognitive functioning. We stu-
died the effect of depression on the executive func-
tioning of patients with multiple sclerosis (MS).

Patients with MS made more errors and repetitions
on verbal fluency tasks, which suggest impairment of
effective performance component of executive func-
tions. Speed of information processing had no effect
on the performance on verbal fluency task. Patients
with MS also performed lower on Trail Making Test.
However, no relationship between depression and
performance on cognitive tasks was found in patients
with MS; it may reflect the relative absence of severe
depression among subjects - most of the subjects
were mildly to moderately depressed.

The committee comment: The importance of this
study was to clarify if executive functions are im-
paired in PwMS and depression, hence producing
false positive results. Unfortunately PwMS and se-
vere depression were not included in the study group
but as has been shown in earlier studies, most PwMS
are moderately or mildly depressed and severe de-
pression is uncommon. Therefore we can conclude
for most PwMS that cognitive tests measuring exe-
cutive functions are not influenced by depression

Mental Health Inventory (MHI) and the Melsbroek Rehabilitation Program (MRP)

L Vleugels, S Reekmans, G Nagels, H Vertommen,
S Ilsbrouckx

The aim of the study was to investigate the effective-
ness of the Mental Health Inventory (MHI) during the
rehabilitation program among the Dutch-speaking
population. MHI's subscales Depression (D), Anxiety
(A), Behavioural Control (BC) and Positive Affect (PA)
were expected to be sensitive to the emotional chan-
ges in MS patients participating in Melsbroek Reha-
bilitation Program (MRP). The purpose of the study
was to collect data for Belgian sample. The other im-
portant aim was to examine the validity of MHI and
to evaluate if MHI is sensitive enough to detect the
effects of the rehabilitation program (MRP).

The results of the study proved that MHI is valid for
the Belgian population and the validity was not lower
(0.95) among PwMS who had cognitive dysfunction.
The results demonstrated that changes in physical
status were not the only variables evaluated by PwMS.
Therefore, goal oriented professionals may underes-
timate the effectiveness of rehabilitation for PwMS.
The findings suggest that MHI is a culturally depen-
dent but valid and reliable instrument, also useful in
patients with mild, MS related cognitive dysfunction
and sensitive to the multiple emotional effects.

The committee comment: This newly adapted
measure seems to be a valuable tool measuring pa-
tients' expectations and detecting the changes for
PwMS as an individual, during the rehabilitation. The
results also suggest that sometimes the specialists'
opinion may not take into account the overall effect
of rehabilitation on PwMS.

We would like to ask all members to check
